**XA 4060****WASHING DETERGENT FOR WATERBORNE COATINGS****Technical characteristics:**

|                          |               |
|--------------------------|---------------|
| Specific gravity (kg/l): | 0.970 ± 0.030 |
| Shelf-life (months):     | 15            |

**General characteristics**

XA 4060 is suitable for washing pumps, spray guns, nozzles and any other equipment used for application of waterborne coatings.

For best results equipment shall be washed with XA 4060 immediately after use, then rinsed with water.

XA 4060 is not a thinner. It is not recommended for cleaning automatic plants as it can remove and detach even dried films of waterborne coatings, which may end up clogging spray guns. It is advisable to let equipment soak in XA 4060 for 1-2 hours, then rinse with water.
