

TECHNICAL DATA SHEET

XT0293/13
SEMI-TRANSPARENT HARMONISING BINDER FOR SOLVENT STAINS

Area of use:	As harmonising additive to solvent stains applied on timbers with grains of different colour
--------------	--

Technical characteristics:

Solids content (%):	18± 1
Viscosity (DIN 4 at 20°C):	48" ± 5"
Specific gravity (kg/l):	0.975 ± 0.030
Shelf-life:	If the product is properly stored, shelf-life is unlimited. After long periods of storage, always check homogeneity and stir well before use to eliminate any possible sediment.

General characteristics

XT0293/13 is very useful when one has to stain a substrate (veneer or solid timber) which is uneven in colour and look. In this case the solvent stain alone (XM8000/XX) would be too transparent to ensure an even colour on the whole surface. By adding small percentages of XT0293/13 (from 1% to 5%), transparency decreases by that extent which ensures that the substrate gets dim, thus giving a more acceptable result.
