SAINT-GOBAIN ABRASIVES

With operations in 64 countries, employing almost 190,000 people, Saint-Gobain is one of the world's top 100 leading industrial corporations. Saint-Gobain Abrasives has a presence on every continent, with operations in 26 countries, employing c.10,700 people; and is the only international manufacturer of the 5 main types of abrasives: Bonded, Coated, Diamond Blades, Cutting-off and Grinding Wheels and Super Abrasives. This market leading, complete abrasive product offer has been designed to meet and perform in all applications: such as cutting, grinding, sanding, smoothing and polishing, for all market sectors including Construction, Civil Engineering, Industrial, DIY and the Automotive Aftermarket.

SANDING

As well as performance, reduction in sanding time is critical for any profitable bodyshop. Norton offers a full comprehensive range of abrasives designed for fast and effective preparation and sanding.

NORTON PRO PLUS DISCS

- SG® ceramic grain for fast and aggressive sanding with an even scratch pattern
- No-Fil® anti clogging coating reduces down time and increases disc life
- Reinforced latex paper for improved tear resistance and increased flexibility

MULTI-AIR® CUT SHEETS

- Up to 35% improved dust extraction over conventional sheets
- SG® ceramic grain for fast and aggressive sanding with an even scratch pattern
- No-Fil® anti clogging coating reduces down time, increasing cut sheet life

FINISHING

Whether it is preparation for blending or sanding awkward, contoured surfaces, the Norton range of finishing products have a solution.

NORTON PRO ROTOLO FOAM

- Foam backed perforated rolls ideal for fine sanding curved and contoured areas
- Aluminium oxide grain and No-Fil® anti clogging coating
- Provides an outstanding finish on primer and top coats
- Reusable pads for wet and dry sanding applications

BEARTEX®

- Ultra flexible, three dimensional non-woven abrasive for easy surface preparation of contoured and curved surfaces
- Impregnated and uniform pad provides a consistent and even finish during use
- For an improved finish use with Norton Scuff Gel

POLISHING

The new Norton water based polishing system offers an effective and simple solution for minor paint rectification and polishing.

NORTON ICE DISCS

- The unique 3D abrasives structure gives extended life, minimises scratch depth reducing polishing time and provides a perfect finish
- The foam backing absorbs water and provides even pressure across all moulded surfaces during sanding
- For optimum polishing results, use with Liquid Ice Polishing Compound

LIQUID ICE

- The Liquid Ice polishing compound offers a fast and effective polishing solution
- Water based polish minimises the risk of heat build-up and reduces polishing time
- Unique Saint-Gobain grain and compound blend, removes scratches and minimises cleaning

THE NORTON OFFERING

As one of the leading manufacturers in the automotive refinishing sector, Norton is committed to the manufacturing and distribution of a wide range of non-paint products for the professional bodyshop. The combination of high quality products, vast experience and knowledge of professional sanding systems- from paint removal to surface reconditioning and polishing, allows you to meet all your repair needs.

MASKING

Norton offer complete protection for all body repair work. From all sizes and types of masking tapes and masking foams, to the new Norton Plastifilm plastic sheeting, we ensure that all applications are catered for.

FOAM EDGE TAPE

- Highly absorbent foam edged tape for protecting doors and edges before spraying
- Recessed adhesive does not leave marks on the surface after removal
- Can be easily and quickly peeled off, requiring no rubbing down

PLASTIFILM

- Waterproof and flexible sheeting prevents paint leakage and moulds to contours
- Resistant to infra-red and temperatures up to 110°C for faster cycle time
- Corona treatment prevents imprint marking on damp vehicles

PAINTING

Norton Paint System is the most effective and productive solution for preparing, mixing and spraying paints. The system allows paint to be stored and reused saving on cleaning time and solvent usage, and allows the operator to paint in all positions including upside-down, without the risk of leakage. The easy to assemble system ensures a consistent spray pattern, convenient storage of paint as well as the easy and clean disposal of the entire unit.

NORTON PAINT SYSTEM

- Each kit comes with a filtered lid, liner and disposable collar
- Removable mixing cup prevents risk of overspray and prolongs Life
- Available in a range of sizes including: 250, 750 and 950ml, along with various filter options

HEALTH & SAFETY

Our range of personal protection equipment is designed to provide the highest standard of protection in the workplace with all products adhering to the most stringent European directives and regulations.

DUAL CARTRIDGE RESPIRATORY MASK

- Soft, non-allergenic material for a smooth and comfortable fit
- Patented hygienic form guard maintains shape and cleanliness after use
- Low profile cartridges provide improved vision
- Cradle suspension and fully adjustable straps for a secure fitting

THE COMPLETE PRODUCT SOLUTION
